CIS Benchmark

CIS (Center for Internet Security) is a nonprofit organization that focuses on providing cybersecurity resources, tools, and best practices to help organizations improve their security posture and protect against cyber threats. CIS is well-known for its CIS Benchmarks, which are consensus-based configuration guidelines for various technology platforms, including operating systems, cloud services, network devices, databases, and more.

- CIS Benchmark
- Version & Updates
- Consensus Based Approach
- Security Controls
- Community Participation
